SUMMARY

Frontend Developer with hands-on experience in building web, mobile, and desktop applications. Skilled in mobile and web technologies. Passionate about creating user-friendly interfaces and developing efficient, scalable solutions. Seeking an opportunity to grow as a software developer.

WORK EXPERIENCE

Oyslans Software Solutions (Pvt) Ltd - Jaffna, Sri Lanka

Trainee Software Engineer

Jan 2024 - Sep 2024

- Contributed to the development of enterprise-level applications using C#, ASP.NET Core, WPF, and Microsoft SQL Server as part of a development team.
- Developed and enhanced modules for a Restaurant Management System, including admin dashboard components and kitchen order management functionality.
- Participated in the development of a Point of Sale (POS) system built using WPF and Clean Architecture, focusing on maintainable and modular code design.
- Implemented a dynamic PDF generation module for the POS system, improving billing and reporting workflows.

PROJECTS

LEAFER MOBILE APPLICATION

Flutter | Python | SQLite | Deep Learning

Group project – Profile module and cure percentage identification after treatment

- Developed a mobile application using Flutter and Python for detecting diseases in banana leaves through deep learning and image preprocessing techniques.
- Contributed to the Profile Screen, Edit Profile, and Change Password modules, delivering smooth and secure user experience.
- Implemented cure percentage identification using a Siamese Network, enabling accurate comparison of leaf conditions and disease severity estimation.
- Integrated SQLite as the local database for efficient data persistence within the mobile application.

CAKESGALORE WEBSITE

HTML, CSS, JS

Developed frontend cake selling Web Application

- Developed a cake-selling website allowing users to browse products and place orders.
- Implemented product listing, cart functionality, and basic order flow using JavaScript.
- Designed a clean and user-friendly interface using HTML and CSS.
- Focused on usability and visual consistency across pages.

FlavorFusion Pies Website

React.js

Developed frontend pizza selling Web Application

- Developed a responsive frontend web application using React.js as component-based architecture.
- Built reusable components for Home, Menu, About, and Contact pages.
- Implemented responsive layouts to ensure compatibility across desktop and mobile devices.
- Focused on clean UI design and intuitive navigation to enhance user experience.

MedStar – Hospital Management System

Developed a desktop application for managing hospitals

- MedStar, an advanced hospital management system designed for seamless administrative management in a hospital.
- WPF | Application using C#, MSSQL, Figma
